

**Problem tags:** **duplicate ×3** same nine content blocks repeated   **30-field wall** conversion friction   **thin** little unique content   **buried** hidden in dropdown   **JS-only** invisible to search & assistive tech   **keep** compliance / genuine content carried over

Key: ■ hub (solid blue border) ■ conversion (amber) ■ compliance (green border) □ stub — client legal copy pending ↗ external template one design, instanced per page

## Merged — one home per topic, no more duplication

|                                                                                  |                                                             |
|----------------------------------------------------------------------------------|-------------------------------------------------------------|
| <span>/book-a-support-worker</span> → <span>/get-started</span>                  | 3 overlapping forms become one 3-step flow                  |
| <span>/referral</span> → <span>/get-started?who=coordinator</span>               | 30-field wall retired; sensitive data moves to meet & greet |
| <span>/register-for-ndis</span> → <span>/resources/new-to-the-ndis</span>        | two thin pages merged into one real guide                   |
| <span>/learn-more-about-ndis</span> → <span>/resources/new-to-the-ndis</span>    |                                                             |
| <span>/fitness-programs</span> → <span>/services/health-fitness-wellbeing</span> | wellness content absorbed into full service page            |

## Promoted — out of the dropdown, into the light

|                                                                      |                                                           |
|----------------------------------------------------------------------|-----------------------------------------------------------|
| <span>/feedback</span> → <span>/resources/feedback-complaints</span> | compliance page, now linked site-wide in the footer strip |
| <span>/faqs</span> → <span>/resources/faqs</span>                    | all 8 genuine answers kept and expanded                   |
| <span>/news</span> → <span>/resources/news</span>                    | plus an article template for consistent posts             |
| <span>-</span> → <span>/coordinators</span>                          | <b>new:</b> the referral channel the old site ignored     |
| <span>-</span> → <span>/accessibility</span>                         | <b>new:</b> WCAG 2.2 AA statement                         |

## Fixed — labels finally match content

|                                                                                  |                                                                    |
|----------------------------------------------------------------------------------|--------------------------------------------------------------------|
| <span>/nutrition-advice</span> → <span>/services/health-fitness-wellbeing</span> | “One on One Supports” at a nutrition URL, resolved                 |
| <span>/support-workers</span> → <span>/team/</span>                              | name grid becomes filterable directory with profiles               |
| <span>/support-workers/{name}</span> → <span>/team/{name}</span>                 | per-profile redirects once bios migrate                            |
| <span>/activities</span> → <span>/activities</span>                              | same address — but now readable by search engines & screen readers |

## Carried over unchanged

|                                                                                                                                                        |                                                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
| <span>/storage/...handbook.pdf</span>                                                                                                                  | Participant Handbook — same path, no redirect needed |
| <span>/storage/...JD.pdf</span>                                                                                                                        | Support Worker job description                       |
| <span>members.fitcare...</span> ➤                                                                                                                      | Members portal subdomain untouched, footer-linked    |
| <span>/login</span> → <span>members portal (confirm)</span>                                                                                            | the one open question — see redirect map             |
| <span>/services</span> · <span>/about</span> · <span>/careers</span> · <span>/contact</span> · <span>/locations/*</span> → <span>same addresses</span> | rebuilt in place                                     |
